

# Preventative Maintenance Inspection (PMI) Program

Reduce costly downtime by having your machine inspected and repairs made *prior* to the next season

Our comprehensive inspections cover:

- Hydraulic and electrical systems
- Engine belts, filters and auxiliary components
- All cab controls and instrumentation
- Suspension, powertrain and frame inspections
- Starting and charging systems performance checks
- All boom functions and systems
- And much more!

*"We've been doing the PMI program for two years, and it has been a great investment. Last year, our total fleet maintenance costs dropped by more than fifty percent. They make sure your equipment is up and running how it should be, and their service team brings an added level of expertise. We can't afford downtime, and their PMI plan has brought extensive savings to our operation and increased productivity."*

**Travis Hazelton | West Central Ag Services**

Please Note:

- Inspections requested after November 30th will be \$795 per unit with no option for a multi-unit discount available.
- All labor and parts quotes valid for 60 days after date of inspection.
